Art. No. 331019

**CE EN ISO 20347:2022+A1:2024 O6 HRO HI CI FO SC SR**
Suede and fabric combination, waterproof and breathable with GORE-TEX® Most Breathable Footwear, leg height 13 cm, antistatic, sole 034
**Available sizes UK 3 – 12, Extra large sizes UK 12½ – 15**

331019

HAIX® Climate System

HAIX® Vario Wide Fit System

**Upper material**
Suede and fabric combination.

**Inner lining**
GORE-TEX® Most Breathable Footwear waterproof and breathable. Abrasion-resistant lining with optimized climate comfort, especially for flexible alternating inside and outside use and at warmer temperatures.

**Insert**
Comfortable, cushioning, moisture-wicking, separate heel cup provides good cushioning and foot guidance, 'AIRFLOW' channels with recycled PU foam

**XLR8**
Technologies to increase performance, control, and endurance. Reforce generates a targeted rotational movement of the heel bone, thereby realigning the arch of the foot. The adaptive heel counter adapts to the individual shape of the heel bone over time and connects it perfectly to the shoe. When stepping, the shoe is controlled by the heel bone. The balanced suspension absorbs impact, stores energy, and releases it back in a targeted manner when pushing off. The ergonomic last allows the foot to unfold naturally and freely, while at the same time guiding the shoe optimally through the foot

**Insole**
Moisture-absorbing fleece insole

**Outsole**
Fuel-resistant, heat- and cold-insulating, non-marking rubber/PU sole with an excellent slip resistance on various terrains. Elastic PU midsole, lightweight, cushioning with raised PU in the heel for improved stability and in the toe for additional toe protection.

**Heel protection**
TPU heel section for additional stability and heel support

**HAIX Anti Slip**
Very good grip on different terrain even in cold conditions, due to the tread design and special rubber used

**HAIX Absorption**
Cushioning with integrated wedge in the insole

**HAIX CO-System**
Pressure relief, cushioning, correction of foot position, body alignment, muscle balance

**HAIX Climate System**
The HAIX Climate System uses the pumping motion created when walking to transport moisture to the outside via the Micro-Dry lining at the top of the shaft

**HAIX Smart Lacing**
Smooth and pressure-free adjustment of the shoe to the foot, quick-release fastener and lace pocket

**HAIX Vario Wide Fit System**
3 different insoles allow the shoe to be individually adjusted in width; the red (medium) insole is supplied with the shoe, while the yellow (wide) and blue (narrow) insoles must be ordered separately

**HAIX AS System**
The HAIX Arch Support System supports the natural arch of the midfoot, providing sufficient space for the toes and balls of the feet, thereby effectively preventing foot deformities

**Other**
low weight, metal-free, antistatic, pull loop, closed lacing system
