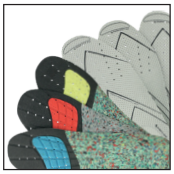
SHADOW FALCON
GTX PRO

mid / sage
Art. Nr. 370004

CE EN ISO 20347:2022 + A1:2024 O7S HRO HI CI FO AN SC SR
Suede and fabric combination, waterproof and breathable with GORE-TEX® Most Breathable Footwear, leg height 14 cm, antistatic, sole 033
Available sizes UK 3 – 12, Extra large sizes UK 13/14/15

370004

DEVELOPED FOR AND WITH SPECIAL FORCES



HAIX® Vario Wide Fit System

HAIX® Climate System

Suitable for fast roping

Upper material
Suede and fabric combination.

Inner lining
GORE-TEX® Most Breathable Footwear waterproof and breathable. Abrasion-resistant lining with optimized climate comfort, especially for flexible alternating inside and outside use and at warmer temperatures.

Insert
Comfortable, cushioning, moisture-wicking, separate heel cup provides good cushioning and foot guidance, 'AIRFLOW' channels with recycled PU foam

XLR8
Technologies to increase performance, control, and endurance. Reforce generates a targeted rotational movement of the heel bone, thereby realigning the arch of the foot. The adaptive heel counter adapts to the individual shape of the heel bone over time and connects it perfectly to the shoe. When stepping, the shoe is controlled by the heel bone. The balanced suspension absorbs impact, stores energy, and releases it back in a targeted manner when pushing off. The ergonomic last allows the foot to unfold naturally and freely, while at the same time guiding the shoe optimally through the foot

Insole
Moisture-absorbing fleece insole

Outsole
Fuel-resistant, heat- and cold-insulating, non-marking rubber/PU sole with an excellent slip resistance on various terrains. Elastic PU midsole, lightweight, cushioning with raised PU in the heel for improved stability and in the toe for additional toe protection.

Highlight: Carbon plate in the sole for performance and puncture protection
The integrated carbon plate acts like a spring, returning energy to the foot with every step. This results in a noticeable reduction in physical effort. At the same time, it supports a dynamic rolling motion and offers reliable protection against hazards from the ground thanks to its puncture-resistant properties.

Heel protection
TPU heel section for additional stability and heel support

HAIX Anti Slip
Very good grip on different terrain even in cold conditions, due to the tread design and special rubber used

HAIX Absorption
Cushioning with integrated wedge in the insole

HAIX CO-System
Pressure relief, cushioning, correction of foot position, body alignment, muscle balance

HAIX Climate System
The HAIX Climate System uses the pumping motion created when walking to transport moisture to the outside via the Micro-Dry lining at the top of the shaft

HAIX Smart Lacing
Smooth and pressure-free adjustment of the shoe to the foot, quick-release fastener and lace pocket

HAIX Vario Wide Fit System
3 different insoles allow the shoe to be individually adjusted in width; the red (medium) insole is supplied with the shoe, while the yellow (wide) and blue (narrow) insoles must be ordered separately

Other
low weight, metal-free, antistatic, pull loop, closed lacing system, suitable for fast roping
